

Gutter Downpipe

FIRE PLUG

Fully Patented

TM

- Blocks off the Downpipe
- Easy Conversion
- Quick Hose Connection

Allows roof gutters to be filled with water

100mm

90mm

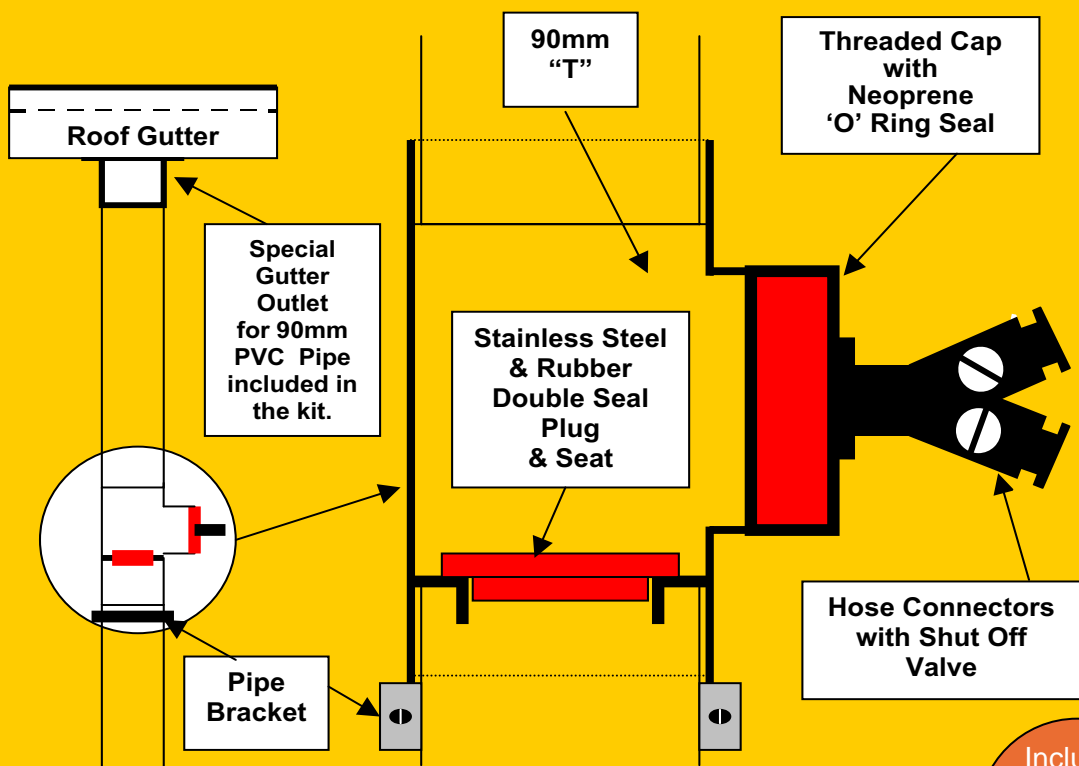

This would have to be the cheapest, simplest and easiest downpipe plug ever.

Takes only minutes to install.

Tested to 8 Metre Head

Simply slip the plug in, connect the hose, turn on the taps, and the downpipe and gutter will fill with water.

Burning embers that end up in the gutter will automatically be extinguished

PVC pipe will withstand exceptionally high heat and flame when filled with water.

Fit a Fire Plug to each downpipe, TODAY.

Includes everything you need just add pipe.

How to Operate: Remove the threaded cap and place the plug correctly over the seat. Replace the cap & hand tighten. Turn the Fire Plug valve to the off position. Connect a hose and turn it on. Slowly turn **ON** the Fire Plug valve. When the gutter is full turn the Fire Plug valve **OFF** Turn the hose tap **OFF** & remove the hose for other uses.

To Empty: Turn the Fire Plug valve **ON** and drain out all the water. Remove the screw cap and remove the plug. Re-fit the screw cap.

Store all plugs in a safe place known to all occupants.

Install at waist height from the ground for best access.

To use the water in the gutter for other purposes connect a hose to the fire plug tap in the same manner as you would for a standard garden tap and turn the fire plug tap on.

Handy Hints: Before filling the downpipes and gutters with water make sure that they are adequately supported. On an average house with 70 metres of gutter plus four downpipes there will be around 700kg of water in the system.

An average tap at 14L per minute will take 50 minutes to fill the system.

After use make sure that all plugs are removed and all water is drained from the system or mosquitoes will breed in the roof gutters.

If you have a rain water catchment system and there has been a fire **BEFORE** removing the plugs flush the gutter system to remove dead embers and ash.

BE PREPARED AT ALL TIMES.

FIRE PLUGS COULD SAVE YOU & YOUR HOME
